

Dry Type Distribution Transformers

Drive Isolation Transformers: 7.5–440 kVA, Three Phase

Special Voltages and kVA Sizes for Drive Applications

For SCR (Silicon Control Rectifier) variable speed motor drive applications, a transformer is needed to magnetically isolate the incoming line from the motor drive. The transformer must also provide a voltage change to match the required voltage of the SCR Drive. Standard designs are delta primary and wye secondary to match the common power sources required in most three phase rectifier circuits.

SolaHD Drive Isolation Transformers are specifically designed to handle the mechanical stresses, voltage demands and harmonics associated with SCR applications.

Applications

- SCR Variable Speed Drives

Features

- Available from 7.5 thru 440 kVA, 3 Phase, 60 Hz
- Isolation minimizes load disturbances caused by the SCR drive
- UL Listed/NEMA Type 3R enclosures when used with optional weather shield
- Taps on all units for adjustments to incoming source voltage. Full capacity secondary neutral as required by the National Electric Code
- Shielding attenuates line to ground noise
- 10 year limited warranty

Certifications and Compliances

All Models

-  Listed
 - E25872 (UL 1561) or E77014 (UL 5085)
 - RoHS Compliant

Selection Table 1: Three Phase

-  us Listed (7.5kVA Models only)
-  Certified (11 and 14kVA Models only)

Related Products

- Surge Protective Devices
- K-13 Rated Transformers for Variable Frequency Drives

Accessories

- Weather Shields and Wall Mount Brackets are available

Enclosure Design Styles*

Enclosure Design Style 1 - Ventilated 118 kVA to 500 kVA

Enclosure Style 2 - Ventilated 11 kVA to 112.5 kVA

*Enclosure Design Style 4 is on Page 4

Notes:

1. Weather shields come in a set of two and must be ordered separately.
2. Encapsulated. No weather shield required. cULus E77014.
3. Units are CSA marked.
4. Transformers designated made to order items are subject to terms and conditions per your order acknowledgment.
