

# Pan-Way® T-70 Surface Raceway System

## specifications

T-70 non-metallic multi-channel capable surface raceway shall be used to route, protect, and conceal data, voice, video, fiber optic and power cabling. The raceway shall be listed as suitable for use in applications up to 600 volts between conductors by Underwriters Laboratories, Inc. per standard 5A, and by Canadian Standards Association, Inc. per 22.2 no. 62.1-03, when screw secured and installed per instructions. A full complement of fittings with a 1" minimum bend radius compliant with TIA/EIA-568-B, must be available as well as device brackets and internal junction boxes to install a variety of communication and electrical devices. Divider walls must be available to form separate channels in the multi-channel raceway. Snap-on faceplates for data and power terminations shall be available. An offset box shall be available, with versions for Snap-on as well as screw mount faceplates, for mounting the power receptacle outside of the raceway channel. T-70 raceway will be manufactured from impact-resistant material with flammability rating of V-0. T-70 raceway must be tamper resistant yet, also allow access for moves, adds and changes. T-70 raceway finish shall be pure color and will resist scratches and dents and will not peel or corrode. T-70 raceway shall be available in four standard colors and shall be optimized for use with the Pan-Net Communication System.

## technical information

<b>Material:</b>	Rigid PVC
<b>Flammability:</b>	UL94V-0; FT4
<b>Voltage rating:</b>	UL-5A 600VAC; CSA C22.2 No. 62.1-03 600 V
<b>Safety compliance:</b>	UL Listed 95425 (raceway); UL Listed E116129 (fittings)
<b>NEC:</b>	Article 388
<b>Color:</b>	Off White (IW), Electrical Ivory (EI), White (WH)
<b>CSI spec form:</b>	LP-CSISPEC-T70-1

## key features and benefits

<b>1" bend radius control fittings:</b>	Reduces time required for planning, designing, procurement, and installation, resulting in simpler specification and up to 75% faster implementation
<b>Snap-on faceplates:</b>	Faceplates snap directly onto the raceway base; cabling can be quickly accessed by removing only the faceplate, requiring less labor and cost of maintenance
<b>Channel has a 70mm opening:</b>	Accepts NEMA standard snap-on or screw-on power or communication faceplates from all manufacturers
<b>Highly tamper resistant:</b>	Very difficult for untrained personnel to enter the raceway or remove faceplates; provides maximum security for communication cabling and maximum safety for power cabling
<b>Non-metallic construction:</b>	Lightweight reduces installer fatigue; solid color throughout profile will not chip peel, rust, corrode, or scratch; easy to cut reducing the need for special cutting devices; high impact resistance; durable
<b>Designer profile:</b>	Aesthetically pleasing and matches a wide variety of decors
<b>Available in three standard colors:</b>	Matches a variety of colors for various applications

## applications

Pan-Way T-70 Non-Metallic Surface Raceway is a multi-channel channel raceway which provides solutions for routing low voltage, fiber optic and/or power cabling along perimeter walls. T-70 raceway can mount NEMA standard screw-on faceplates or superior Pan-Way Snap-on Faceplates directly to the channel. T-70 features the Workstation Outlet Center™ Offset Box, which provides an offset solution to maximize channel capacity and outlet density.
