## Safety Considerations

- Read this document for information on installation, handling, mounting, general product specifications, and operation of this product. These installation instructions contain important information on handling the instrument.
- Working safety requires that all safety instructions and work instructions are observed.
- Observe the relevant local accident prevention regulations and general safety regulations for the range of use of the instrument.
- The installation instructions are part of the product and must be kept in the immediate vicinity of the instrument and readily accessible to skilled personnel at any time.
- Skilled personnel must have carefully read and understood the operating instructions before any work begins.
- The Bulletin 836PH-D is a pressure switch for measuring and monitoring absolute and gauge pressures. The device has been safely built with state-of-the-art technology and meets the applicable requirements and EC directives. It can, however, be a source of danger if used incorrectly or for anything other than the designated use.
- Qualified individuals are required for installation and commissioning. Failure to comply results in personal injury or equipment damage.
- Before installation, commissioning and operation, be sure that the appropriate pressure switch has been selected in terms of measuring range, design, and specific measuring conditions.

## Qualified Personnel

Qualified personnel are understood to be personnel who, based on their technical training, knowledge of measurement and control technology, and on their experience and knowledge of the country-specific regulations, current standards and directives, are capable of carrying out the work described and independently recognizing potential hazards.

## Recommended Installation for Optimal Performance

## Specifications

| Attribute                                | 836PH-D1x, 836PH-D2x   |
|--|--|
| Certifications                           | CE Marked for all applicable directives - Pressure equipment directive 97/23/EC<br>EMC directive 2004/108/EC, EN 61326 emission (group 1, class B) and interference immunity (industrial application)<br>RoHS conformity - 2011/65/EU<br>IO-Link, 3A certified |
| <b>Environment: Operating Conditions</b> |  |
| Ambient temperature range                | -20...+80°C (-4...+176°F)  |
| Media                                    | -20...+100°C (-4...+212°F)   |
| Storage temperature                      | -20...+80°C (-4...+176°F)  |
| Vibration resistance                     | 10 g (0.35 oz) (IEC 60068-2-6, under resonance)  |
| Shock resistance                         | 50 g (1.76 oz) (IEC 60068-2-27, mechanical)  |
| Humidity                                 | 45...75 % r. h.  |
| Ingress protection                       | IP65 and IP67  |
| Overpressure limit                       | 2 times (1.7 times for the relative pressure measuring ranges 160 psi, 1,000 psi, and 1,500 psi)   |
| <b>Electrical</b>                        |  |
| Power supply                             | 15...35 V DC   |
| Current consumption                      | Switching outputs with:<br>Analog signal 4...20 mA; 70 mA;   |
| Total current consumption                | 450 mA maximum when operating in IO-Link   |
| <b>Outputs</b>                           |  |
| Output type                              | 1 PNP (IO-Link) and 4...20 mA analog   |
| Zero offset adjustment                   | Maximum 3% of span   |
| Output thresholds                        | OUT 1 programmable via push button or IO-Link  |
| Output modes                             | Selectable — Normally open, normally closed, window, hysteresis  |
| Output voltage                           | (Power Supply -1V)   |
| Output current                           | 100 mA maximum   |
| Load                                     | Analog signal 4...20 mA: $\leq 0.5 \text{ k}\Omega$  |
| Service life                             | 100 million switching cycles   |
| Settling time                            | Analog Signal: 3 ms<br>Switching Output: 20 ms with IO-Link  |
| <b>Accuracy Data <sup>1</sup></b>        |  |
| Analog signal                            | $\leq \pm 1.0\%$ of span<br>Including non-linearity, hysteresis, zero offset, and end value deviation (corresponds to measured error per IEC 61298-2). Calibrated in vertical mounting position with process connection facing downwards.                      |
| Non-linearity                            | $\leq \pm 0.5\%$ of span (BFSL, IEC 61298-2)   |
| Long-term drift                          | $\leq \pm 0.2\%$ of span (IEC 61298-2)   |
| Switching output                         | Switch point accuracy: $\leq \pm 1\%$ of span; Adjustment accuracy: $\leq \pm 0.5\%$ of span   |
| Display                                  | $\leq \pm 1.0\%$ of span $\pm 1$ digit   |
| <b>Reference Operation Conditions</b>    |  |
| Operating temperature                    | 15...25°C (59...77°F)  |
| Atmospheric pressure                     | 950...1,050 mbar (13.78...15.23 psi)   |
| Humidity                                 | 45...75 % r. h.  |
| Nominal position                         | Process connection lower mount (LM)  |

## Specifications

| Attribute                   | 836PH-D1x, 836PH-D2x                     |
|-----------------------------|--|
| <b>Electrical Safety</b>    |  |
| Short-circuit protection    | 4...20 mA, Out 1 vs. V-                  |
| Reverse polarity protection | V+ and V-                                |
| Insulation voltage          | 500V DC                                  |
| Overvoltage protection      | 40V DC                                   |
| <b>Material</b>             |  |
| Wetted parts                |  |
| Process connection          | Stainless Steel 316L                     |
| Pressure sensing elements   | Stainless Steel 316L                     |
| Non-wetted parts            |  |
| Housing                     | Stainless Steel 304                      |
| Keyboard                    | TPE-E                                    |
| Display window              | Polycarbonate                            |
| Display head                | Polycarbonate and ABS                    |
| <b>Process Connection</b>   |  |
| Thread                      | 1.5 in. tri-clamp<br>2 in. tri-clamp     |
| Pressure transmission       | Medium: KN92 medicinal white mineral oil |

<sup>1</sup> Typical temperature co-efficient of 0 point: 0...22°C (32...71.6°F): 0.7% of span/10K, 20...80°C (68...176°F): 0.2% of span/10K. Typical temperature co-efficient of span: 0...80°C (32...176°F): 0.1% of span/10K.

## IO-Link Specifications

|                      |                    |
|----------------------|--------------------|
| IO-Link Protocol     | Version 1.1        |
| Minimum Cycle Time   | 3 ms               |
| Rate                 | COM2 (38.4 k Baud) |
| Process Data Length  | 16 bit (Frame 2.2) |
| Data Storage Support | Yes                |

### 1.5 in. Tri-clamp Process Connection and Approximate Dimensions [mm (in.)]

| Attribute          | Description   |
|--------------------|---|
| Measuring Cell     | Piezo resistive measuring cell and metallic measuring diaphragm |
| Application        | Measurement and monitoring of absolute and gauge pressures      |
| Process Connection | Thread<br>– 1.5 in. tri-clamp<br>– 2 in. tri-clamp              |

### 2 in. Process Connection and Approximate Dimensions [mm (in.)]

### 1 PNP x 4...20 mA Wiring Diagrams

**IMPORTANT** IO-Link operation is only available when connected to an IO-Link Master such as the 1734-4IOL or any competitive IO-Link Master. While in Standard IO mode (SIO), the sensor operates as a discrete PNP output.

### Mating Cables

889D – F4AC-2 (M12x1 connector).

889D-R4AC-2 (M12x1 right angle connector).

## Measuring Ranges

| Gauge Pressure               |             |               |             |              |              |              |              |              |
|------------------------------|-------------|---------------|-------------|--------------|--------------|--------------|--------------|--------------|
| bar                          | 0...2       | 0...2.5       | 0...4       | 0...6        | 0...9        | 0...13       | 0...17       | 0...20       |
| psi                          | 0...30      | 0...36.2      | 0...60      | 0...100      | 0...145      | 0...200      | 0...250      | 0...300      |
| Absolute Pressure            |             |               |             |              |              |              |              |              |
| bar                          | 0...2       | 0...2.5       | 0...4       | 0...6        | 0...10       | 0...13       | 0...17       | 0...20       |
| psi                          | 0...30      | 0...36.2      | 0...60      | 0...100      | 0...145      | 0...200      | 0...250      | 0...300      |
| Vacuum and ± Measuring Range |             |               |             |              |              |              |              |              |
| bar                          | -1...+2     | -1...+2.5     | -1...+4     | -1...+6      | -1...+9      | -1...+13     | -1...+17     | -1...+20     |
| psi                          | -14.5...+30 | -14.5...+36.2 | -14.5...+60 | -14.5...+100 | -14.5...+145 | -14.5...+200 | -14.5...+250 | -14.5...+300 |

**Note:** Overpressure limit 2 times; 1.7 times for the relative pressure measuring ranges 160 psi, 1000 psi, and 1,500 psi.

## Output Signals

| Output Model Type | Switching Output 1 | Switching Output 2 | Analog Signal      |
|-------------------|--------------------|--------------------|--------------------|
| 1 PNP x 4...20 mA | PNP                | —                  | 4...20 mA (3-wire) |

## Commissioning

**ATTENTION:** Only for use with the pressure switch if it is in perfect condition with respect to safety.

**Check the following points before commissioning:**

- Leaking fluid is indicative of damage.
- Since this is a safety-relevant component, check the diaphragm for any visible damage.

**Required tool:** Size 27 open-ended spanner and screwdriver.

## Making the Mechanical Connection

- While mounting, make sure that the sealing faces at the instrument are clean and undamaged.
- Only screw in or unscrew the instrument via the spanner flats. Never use the case as a working surface.
- The correct torque depends on the dimensions of the process connection and the gasket used (form/material).
- When screwing in, be careful not to cross the threads.

## Making the Electrical Connection

- The instrument must be earthed via the process connection.
- The power supply for the pressure switch must be made via an energy-limited electrical circuit in accordance with section 9.3 of UL/EN/IEC 61010-1 or an LPS to UL/EN/IEC 60950-1 or class 2 in accordance with UL1310/UL1585 (NEC or CEC). The power supply must be suitable for operation above 2,000 m (6,561.6 ft) should the pressure switch be used at this altitude.
- For cable outlets, make sure that no moisture enters at the cable end. Dismounting and Disposal

## Dismounting and Disposal

**ATTENTION:** Residual media in the dismantled pressure transmitter can result in a risk to persons, the environment, and equipment. Take sufficient precautionary measures.

**Dismounting:** Only disconnect the pressure transmitter once the system has been depressurized.

**Disposal:** Incorrect disposal can put the environment at risk.

Dispose of instrument and packaging materials in an environmentally compatible way and in accordance with the country-specific waste disposal regulations.

## Keys and Functions Programming

Status switching output2 (optional)

Status switching output1

Display mode

- Short Press  
Display of the Unit
- Long Press  
Display of the Set Parameters

Programming mode

- Short Press  
Menu up  
Parameter Value up (Step-wise)
- Long Press  
Menu up  
Parameter Value up (Fast)

**Note:** The pressure switch has two operating modes, the display mode, and the programming mode. The function of the keys depends on the selected operating mode.

**Enter key:** In programming mode, press the enter key once to set the values for the selected parameters.

4-digit indicator display

- Display Pressure Value
- Display Menu Item
- Display Parameter

Display mode

- Short Press  
Display of the Unit
- Long Press  
Enter the Programming Mode

Programming mode

- Short Press (Equals three seconds)  
Menu up  
Parameter Value up (Step-wise)
- Long Press (Equals five seconds)  
Menu down  
Parameter Value Down (Fast)

Display mode

- Short Press  
Display of the Unit

Programming mode

- Short Press  
Select Menu Item  
Confirmation of the Input

**Note:** Short press equals three seconds; long press equals five seconds.

| Keys (Simultaneously pressing the info and menu keys exits the programming mode and returns to display mode.) | Function  |   |   |
|---|---|---|---|
|   | Display Mode  | Programming Mode (Press the menu key for five seconds to enter programming mode.) |   |
|   | Short Press:<br>• Display of the unit<br>Long Press:<br>• Display of set parameters | Short press: toggle parameter up (step-wise)                                      | Short press: toggle parameter up (fast scroll)  |
|   | Short Press:<br>• Display of the unit<br>Long Press:<br>• Enters programming mode   | Short press: toggle parameter down (step-wise)                                    | Long press: toggle parameter down (fast scroll) |

## Parameters

| Parameter | Description  |
|-----------|--|
| SP1/SP2   | Hysteresis function: Switch point switching output (1 or 2)  |
| FH1/FH2   | Window function: Window high switching output (1 or 2)   |
| RP1/RP2   | Hysteresis function: reset point switching output (1 or 2)   |
| FL1/FL2   | Window function: Window low switch output (1 or 2)   |
| EF        | Extended programming functions   |
| RES       | Return the set parameter to the factory settings   |
| DS1/DS2   | Switch delay time, which must occur without interruption before any electrical signal change occurs (SP1 or SP2)   |
| DR1/DR2   | Switch delay time, which must occur without interruption before any electrical signal change occurs (RP1 or RP2)   |
| OU1       | Switching function switching output (1 or 2)   |
| OU2       | HNO = hysteresis function, normally open<br>HNC = hysteresis function, normally closed<br>FNO = window function, normally open<br>FNC = window function, normally closed |

| Parameter | Description  |
|-----------|--|
| UNIT      | Unit switching   |
| OSET      | Offset adjustment (3% of span)   |
| DISM      | Display value in display mode<br>CT= actual pressure value; LOW, HIGH = minimum, maximum pressure value<br>OFF= display off;<br>SP1/FH1 = function switch point 1, RP1/FL1 = function reset point 1,<br>SP2/FH2= function switch point 2, RP2/FL2 = function reset point 2 |
| DISU      | Display update 1, 2, 5, 10 updates/second  |
| DISR      | Rotate display indicator by 180°   |
| RHL       | Clear the minimum and maximum value memories   |
| PAS       | Password input, 0000= no password<br>Password input digit by digit   |
| TAG       | Input of a 16-figure alphanumeric measuring point number   |

### Menu (Programming and Factory Setting)
