

## Blue label two-pole UL non SCCR Type 4 control BSP low voltage SPDs for 24Vac/dc to 230Vac/dc systems

### Description

The Bussmann UL Type 4 24Vac/dc, 48Vac/dc, 60Vac/dc, 120Vac/dc and 230Vac/dc, two-pole, modular surge arresters feature local, *easyID*™ visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

### LV Control System Arresters

The features of these two-pole devices are for use in coordination with other upstream SPDs in UL 508A applications\*.

- Surge arrester according to UL 1449 3<sup>rd</sup> Edition Type 4 component assembly for Type 3 applications helps meet UL 508A requirements
- Proven MOV and GDT hybrid technology for reliable surge protection
- “Thermodynamic Control” SPD monitoring device ensures high reliability against surge events
- Module locking system with module release button make module replacement easy without tools
- Optional remote signaling of all modules make status monitoring easy and accurate in any monitoring scheme
- Vibration and shock tested according to EN 60068-2 to withstand harsh environments

### Optional remote signaling Form C contact

The remote signaling contact versions have a floating changeover contact for use as a break or make contact for easy adoption in any monitoring application.

\* Except as noted in data sheets.
