TOP HAT

HIGH VOLUME WIRE COVER

BEFORE

AFTER

As a simple box cover the Top Hat Cover is used instead of a blank cover with several important advantages. The Top Hat Cover allows installers to leave wires that enter the junction boxes extending straight. With the depth of the Top Hat Cover there is no need to coil wires and stuff them into the smaller parts of the junction box. This will save time during installation and more importantly during troubleshooting. Additionally the Top Hat Cover makes it easier to access the contents of any junction box.

- 4" SQUARE VOLUME COVER
- 38.5 CUBIC INCHES
- PLENUM RATED
- QTY = 50/BOX
- CASE WEIGHT: 13.5 LBS
- MADE IN AMERICA

UL PATENT PENDING
