

# Installed Base UPS Assessment

## Mitigate UPS Failure and Downtime Tied to Old or Undersized UPS Systems

### **FREE** Installed Base UPS Assessment

An assessment service that can help you review your UPS uses, needs, maintenance and replacement.

### ASK YOURSELF

- » Do you have UPS units that have been installed for a very long time?
- » Have you added equipment and load to an existing UPS?
- » Are you monitoring your UPS units?
- » Have you tested your UPS units?
- » If you could stand to have a free UPS review, then the Kirby Risk **Installed Base UPS Assessment** is for **YOU!**

### BENEFITS

Kirby Risk's assessment offers a high-level evaluation of your UPS units and strategy in partnership with key manufacturing partners.

### THE KIRBY RISK DATACOM SOLUTIONS TEAM

Our team is comprised of BICSI Trained & Certified experts including a BICSI RCDD (Registered Communications Distribution Designer) on staff.

Our team has more than 200 plus years of combined datacom experience assessing, designing, and deploying all aspects of industrial, commercial and datacenter physical network infrastructure.

## WHAT TO EXPECT

### FIELD COLLECTION

This five-point, standards-based assessment evaluates your existing UPS for current state as well as an overall UPS strategy.

### WHAT WE'LL ASSESS

1. Installation Conditions
2. Power and Load Review
3. Battery Age and Life Estimations
4. UPS Monitoring Review
5. Intended Use and PDU's

### WHAT YOU GET BACK

- Findings report detailing identified issues by functional area.
- Actionable standards and best practices remediation recommendations.
- Budgetary bill of material based upon the suggested and or supplied remediation.
- Integrator, contractor and manufacturer referrals.
